Division of Biostatistics

The "Happy Scientist" Workshop #24

JAX Lecture 2:
Transformable Programs and More

Alonzo Church (1903-1995) was an American computer scientist, logician, mathematician and philosopher who advised numerous influential computer scientists, including Alan Turing and Stephen Kleene. Together with Alan Turing, they proposed the "Church-Turing Thesis", which states that any function which is computable can be computed using the lambda calculus or Turing machine

Presenter: Nick Mancuso, Ph.D.
Associate Professor, USC

Thursday, January 30th, 2025
12:00pm to 12:50pm
In-person: SSB Room 114
